

DEMO: PROBLEM TREE

**DEMO: OBJECTIVE TREE**

**DEMO: OBJECTIVE TREE + CLUSTERING**

**DEMO: LOGICAL FRAMEWORK**

	Logic of intervention	Indicators (OVI)	Sources of verification	Assumptions	
<b>Overall Objective</b>	Income truck drives families stable AIDS related mortality among truck drivers stabilised	Total income of truck drivers families generated from truck driving is stable, 2005 – 2015 in Rubadunia Crude mortality rate among truck drivers from AIDS is 22% in 2005 and will be 22% in 2015, in Rubadunia	World Bank country statistics UNAIDS statistics		
<b>Project Purpose</b>	Decreased risk of new HIV infections among truck drivers	No of new HIV infections among 100.000 long distance truck drivers (> 18 yrs) is reduced from 75 to 60 new cases per month, in Rubadunia from 2005 - 2015	Interviews by Community workers Rub. Red Cross Data from VCT Centres	AIDS patients are properly cared for at home Social Stigma AIDS patients reduced	
<b>Results</b>	1. Truck drivers practise safe sex with non-regular partners	2. Sufficient no of condoms available	3. STD rates are reduced (well diagnosed and treated)	4 Effective Voluntary Counselling and Testing services in place	Condoms remain affordable (price) for truck drivers
<b>Indicators (OVI)</b>	Use of condoms by truck drivers (> 18 years) in non-regular contacts is 59% in '05 and will be 90% in '10	At each major truck stop (63 in total) the shop/bar has 50 condoms in stock, at any during day/night, from 2005 – 2007 in Rubadunia	STD patients receiving treatment from official health facilities is 69% (of all STD patients), will be 85% in 2010	No of trucks drivers (HIV negative and positive) that (voluntarily) have done a pre-test, post-test and follow up counselling is 30.000 in 2005 and will be 55.000 in 2010, in Rubadunia	
<b>Sources of verification</b>	Rubadunian Red Cross survey in collaboration with NGO Care-4-us	Stock report Observations by Care-4-us	Statistics health facilities	Statistics of VCT	
<b>Activities</b>	1.1 To develop materials explaining frequent unequal gender relations in sexual practices 1.2. To organise education programmes for truck drivers 1.3 To organise mass media campaign, bill boards along roadside promoting use of condoms	2.1 To identify appropriate shops/bar at major truck stops 2.2 To set up distribution system 2.3 To distribute condoms	3.1 To train health workers on STD diagnosis 3.2 To ensure availability of essential drugs to treat STDs in health facilities 3.3 To organise a campaign on STD prevalence and treatment	4.1 To establish 1 VCT centre per major truck stop (63 total) 4.2 To staff each VCT centres with 1 physician, 1 nurse and 3 counsellors 4.3 To equip centres with laboratory equipment, HIV kits 4.4 TO train counsellors in pre- and after testing counselling	Sufficient no of counsellors are willing to work at truck stops Truck drivers are willing to do all the tests at the VCT centre
<b>Preconditions:</b> Improved government commitment towards combating AIDS (financial support and support objectives programme)
